PRESS RELEASE | MAY 6, 2009

JOEL BERMAN GLASS STUDIOS IN ASSOCIATION WITH GLASS INSPIRATION ANNOUNCES BERMAN INTERLAYERS

Joel Berman Glass Studios in association with Glass Inspiration presents *Berman Interlayers*, a collection of decorative panels for architecture and design featuring a unique selection of inspired interlayer materials encapsulated in glass.

Interlayer materials are united with glass in quality composite units in which the beauty of the integrated materials is carefully preserved from the effects of dust, moisture and temperature. The durability, structural and safety advantages of laminated glass are well established in the building construction industry, and are achieved with richness and sophistication in *Berman Interlayers*.

Four collections of interlayer materials are currently offered:

1. woven wood veneers;
2. natural fibres;
3. woven metal mesh; and
4. perforated and stretched metals.

Panels are custom fabricated based on desired sizes, glass thickness, and chosen interlayer materials. Panels can be shape-cut, drilled, notched, and the edges beveled or polished.

"Berman Interlayers is another way that Joel Berman Glass Studios expands the designer's palette," said Joel Berman, president and founder. "The beauty and luminosity of glass combined with evocative and inspiring encapsulated interlayers invites endless design possibilities."

###

Joel Berman Glass Studios is a world-renowned designer and manufacturer of glass art for the architectural and design community offering leading edge designs and collaboration possibilities to take any glass design project from concept to installation. From its design studio and manufacturing facilities located in Vancouver, BC, Canada Joel Berman Glass Studios offers kiln-cast and pressure-formed glass, crafted to the highest standards and featuring designer textures, colors, hardware and design services, all delivered with unparalleled custom focus. www.jbermanglass.com
